

**SpectraPrism™**

Coloured laminated glass

16 base colour interlayers

Thousands of combinations

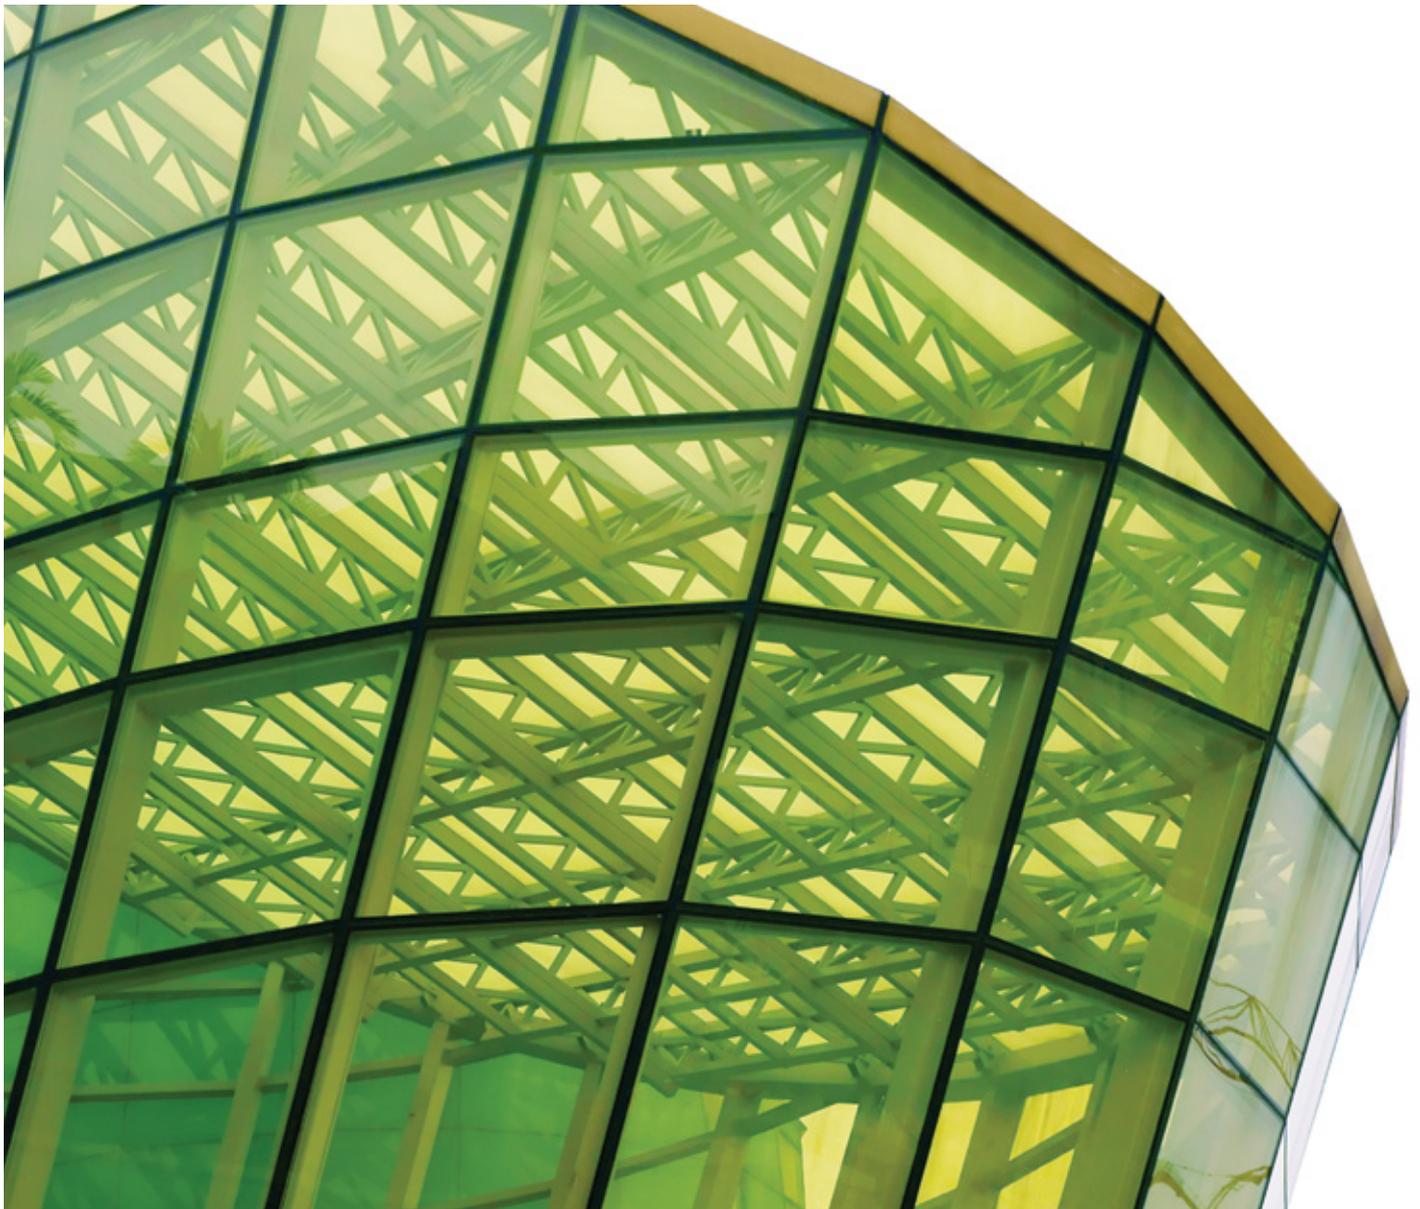

# SpectraPrism™

The effects you create with SpectraPrism™ can be dynamic or subtle. Using the Vanceva® Colour System, celebrate them on an urban scale across a building envelope, or on a human scale in a more intimate setting. And you can apply them to virtually any context – from office partitions to residential kitchens, commercial facades to overhead glazing.

See colour in a whole new light.

SpectraPrism™ will open your eyes to the infinite design potential of coloured glass. A laminate comprising one or more colour interlayers enclosed within glass sheets, it can be used to articulate external form as either a facade element or glazing, and equally to craft distinctive, expressive interiors.

But that's just the beginning. As SpectraPrism™ transmits light with varying degrees of translucency, your designs can also fully explore the interplay of colour, space, light and shadow to engender a particular ambience or unique sense of place.

*The images shown are a representation only of the product. Colour and effect may differ. Always refer to a sample to determine if product is appropriate for your requirements.*

## A palette load of choice.

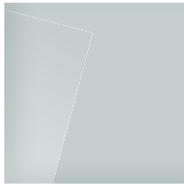

SpectraPrism™ gives you incredible flexibility and control over colour. There are 16 base interlayers in the range – 12 transparent, two translucent and two opaque – which you can use individually, or blend in any combination to create thousands of options with the the exact hue, saturation and luminosity you require.

Manufactured using heat and light stable Vanceva® pigments – not dyes – the colour you choose or create will remain both lightfast over time, and consistent in appearance regardless of the glass thickness.

### Transparent

Evening Shadow  
0007

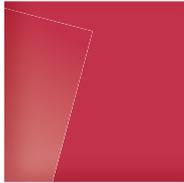

Ocean Grey  
000H

## For added effect.

In addition to almost limitless colour choices, SpectraPrism™ can be paired with other Viridian products to create stunningly original design features, which blur the line between art and architecture.

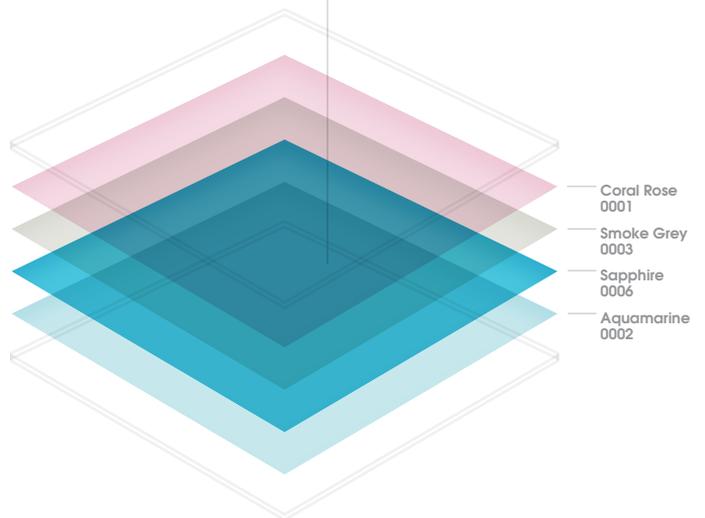

Add a gentle pastel to the satin finish of SpectraPrism™ acid-etched patterning for a sense of sophisticated elegance. Combine one of the brighter SpectraPrism™ colours with the bold geometries of ScalaSeraphic™ to organise, dramatise or delineate space. If you can imagine it, Viridian can help you realise it.

### Bespoke

Combine up to four layers of Vanceva® laminates between Viridian glass to achieve your bespoke SpectraPrism™ colour.

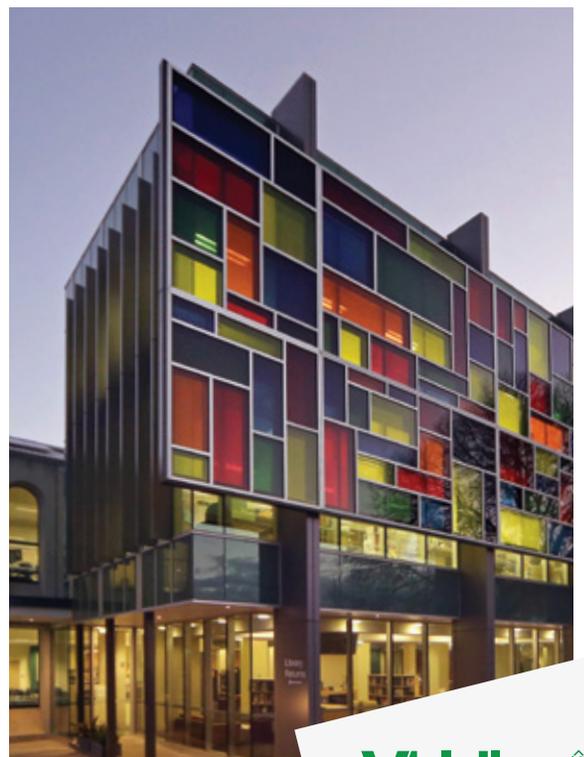

Combination Example  
Colour 1362  
(0001 + 0003 + 0006 + 0002)

## A full spectrum of applications.

As the SpectraPrism™ range is laminated to meet Grade A Safety Glass standards, it can be used for a complete range of interior and exterior applications for any typology – office, retail, education, hotel and hospitality, multi-residential or domestic.

Massed or juxtaposed, understated or audacious, decorative and/or functional, the use of SpectraPrism™ coloured glass will enrich any space or architectural feature, large or small.
