### How to specify

- ◆ **Select glass name**  
Viridian MirraEcho, MirraTrust, MirraShield and MirraCloud
- ◆ **Select thickness – process**  
3mm to 6mm – Silver  
6.38mm – Clear
- ◆ **Select colour**  
Refer to product range chart below

# High reflection and environmentally friendly

## Description

Viridian **MirraEcho™** is the successful culmination of extensive design and testing to bring to the market a world class innovative product that provides very high light reflection.

It is a high specification mirror which incorporates excellent protection of the reflective silver coating without the need for the copper layer used in conventional mirror processes. Provides greater resistance to natural corrosion, so minimising the unsightly problems of black edges and spot faults. **MirraEcho™** is also provided with two coats of special backing paint which gives additional protection from steam, moisture and chemicals.

Viridian **MirraTrust™** and Viridian **MirraShield™** comply with AS/NZS2208 for Grade A safety glazing materials. **MirraTrust™** is backed with a special vinyl film and **MirraShield™** is a laminated mirror.

Viridian **MirraCloud™** combines the best features of **MirraEcho™** and **LuminaCloud™** making it a high quality decorative product perfect for interior applications. The silver coating creates a unique and appealing metallic finish with a diffused light reflection, without being spectrally reflective.

**MirraEcho™** is suitable for edgework processing, including bevelling.

## Installation

There are many techniques that can be used to install mirrors, from framing to adhering directly to a door or wall. The adhesive to be used must be checked with the manufacturer for compatibility with **MirraEcho™** paint or vinyl backing. It is also recommended that the adhesive only be applied in vertical strips.

## Cleaning

Some cleaning solutions can damage the mirror coating. Mild detergents are recommended.

## Features and benefits

- ◆ Higher corrosion resistance than conventional copper backed mirrors
- ◆ Improved resistance to cleaners and adhesives
- ◆ **MirraTrust™** is available as a Grade A safety product
