How to specify

- ◆ **Select glass name**
Viridian LuminaMist, LuminaMist Grey or LuminaMist SuperClear
- ◆ **Select thickness – process**
6.38 to 12.38mm – Laminated
6.38mm to 12.76mm – Laminated
7.52mm to 13.52mm – Toughened/Laminate

Providing privacy with Grade A laminated safety glass

Viridian **LuminaMist™**, **LuminaMist™ Grey** and **LuminaMist™ SuperClear** are becoming popular for screening and privacy applications. With a frosted appearance made by bonding two or more sheets of glass together with a PVB interlayer, the result is a durable glazing material that can be used for a variety of applications. As the translucent interlayer is contained between the two sheets of glass, the product does not fingerprint and is easy to clean.

Description

As with Viridian **Scalatexture™** glass, where privacy is an important consideration, this product is appropriate for obscuring vision and diffusing light.

LuminaMist™ has a white appearance and a light transmission of 68%.

LuminaMist™ Grey has a frosted grey appearance and a light transmission of 32%.

LuminaMist™ SuperClear has brilliant white appearance and a light transmission of 70% (10.38mm).

Features and benefits

- ◆ Contemporary range – stocked for ease of availability
- ◆ Economical method of providing permanent privacy and decoration
